

Magellan® 8500 Ω

With OmegaTek™ Productivity Technology

At A Glance

“Cashiers are dragging product across the scanner once and getting the read. They no longer have to twist their wrists to manipulate the item to re-scan product. We managed to untrain the twisting motion they learned years ago and they are telling us they feel better”

—Bob Shoening, CIO, Pathmark

What is OmegaTek™ Productivity Technology?

OmegaTek™ Productivity Technology is comprised of hardware and software innovations that significantly improve scanner performance by increasing the scanning speed and by improving the first pass read rates on hard-to-read bar codes. This yields:

- Improved front end checkout productivity by reducing or eliminating re-scans or no-scans
- Improving customer service by reducing the time a customer has to wait in the checkout line
